Does it hurt?

The first time may be more uncomfortable. Why, because the root of the hair is being removed from the hair follicle. All of the hair will not grow back at the same rate of speed. Keeping your wax up every four weeks will not allow the root of the hair to strongly secure in the follicle, making each following wax more comfortable.

Will the hair grow back thicker, stronger or darker?

No, waxing will not cause the color of the hair to change. The hair actually grows back finer when removed by the root.

How long does the hair have to be to get a wax?

Three weeks of growth, regardless of the body part.

How do I care for the waxed area at home?

You need to clean the area very well to make sure the hair follicle does not get clogged. The rules for after waxing service are no sun 24 - 48 hours, no hot baths, no abrasives or deodorant for 12 hours.
